**TORQUE FORCE, A DIVISION OF CANIMEX INC., INTRODUCES  
A NEW STAMPED ALUMINIUM COLLECTION OF DECORATIVE DOOR HARDWARE**

---

**Drummondville (Canada), 2008, January 14<sup>th</sup> – Canimex Inc. presents a new series of stamped aluminium products which as been added to its *Spade* collection of Decorative door hardware.**

Stamped aluminium lift handle, pull handle and 16” hinge are available. Black powder coated with a textured finish, these products add style and character to any kind of door. Perfectly rust-resistant, these are ideal for coastal areas where sea salt is doing serious damage. With the stamped aluminium series, Canimex is eliminating rust problems.

“Highly resistant, our aluminium is carefully selected to offer you the strength you need. This is a perfect product for people looking for weatherability and durability. Torque Force proves once again his leadership in innovation”, says Michel Beaudoin, Director of the Torque Force Division.

**Canimex Inc. : A history of dedication to manufacturers**

Founded in 1969, Canimex began as an importer-exporter of mechanical power transmission components and industrial supplies for the manufacture of snowmobile and agricultural machinery. Since then, our company operations have expanded and diversified to include three distinct divisions : Mechanical Power Transmission, Fluid Power and Torque Force garage doors hardware.

Our name is synonymous with innovation, performance and superior quality. We benefit from a dynamic, dedicated and skilled workforce of close to 850 and maintain warehouse and highly advanced production facilities totaling over 550 000 square feet.

Canimex’s Torque Force Division is recognized as a world-class OEM supplier, committed to delivering a broad range of specialized, high value hardware components to Access Systems manufacturers.

***Canimex... The Driving Force in Innovation.***
