**A NEW WEBSITE FOR
TORQUE FORCE, A DIVISION OF CANIMEX INC.**

Drummondville (Canada), November 12th, 2007 – Canimex Inc. upgraded its website at www.canimex.com, offering a new look and a lot of improvements to information and surfing. That's only a beginning since Canimex announces more changes to come.

The Torque Force website presents all product lines offered by the company as well as information about the engineering team, the quality assurance system, and the manufacturing process. A technical support section is also part of the website to assist customers with their research about specific products.

“We are very proud to launch a new website offering an improved experience for our customers, following in this way our tradition of excellence”, says Michel Beaudoin, Director of Torque Force Division.

Canimex Inc.: A history of dedication to manufacturers

Founded in 1969, Canimex began as an importer-exporter of mechanical power transmission components and industrial supplies for the manufacturing of snowmobile and agricultural machinery. Since then, our company operations have expanded and diversified to include three distinct divisions: Mechanical Power Transmission, Fluid Power, and Torque Force garage doors hardware.

Our name is synonymous with innovation, performance and superior quality. We benefit from a dynamic, dedicated and skilled workforce of close to 850 people and maintain warehouses and highly advanced production facilities totaling over 550 000 square feet.

Canimex's Torque Force Division is recognized as a world-class OEM supplier, committed to delivering a broad range of specialized, high value hardware components to Access Systems manufacturers.

Canimex... The Driving Force in Innovation.
